

THE PICOCH WEEKLY RECORD. SATURDAY.....MAY 25, 1878. LOCAL INTELLIGENCE.

GLOBE DISTRICT, ARIZONA.

The following from Globe District, Arizona, written by an old Piocher, may be of some interest to our readers. He says: "I am disappointed in the general appearance and outlook of the camps and district. Too slow. Don't believe there are upwards of 1,000 men in the entire district, which embraces thirty miles square and ten different camps. Since my arrival here I have been on the go continually looking at the different camps and prospecting. Have looked at all the principal mines talked about or of much note and yet am unable to fully make up my mind as to little development has been made. The "Stonewall Jackson" are drifting on a small feeder or strata and about once a month ship considerable very rich ore, say from \$60,000 to \$80,000, to San Francisco. They have prospected the main fissure to about 100 feet, by sinking two shafts and cross-cutting, but found nothing that would pay. The small strata they are working upon is about two inches wide and carries ore, worth on the average, \$8,000 per ton, and, in my judgment, is liable to give out at any time, and if such should be the case assessments would be in order. They are now working 35 men, but if the strata looks poorly will discharge half until it looks better. As for the other mines in the McMillen Camp, don't think much of them. The country is all monumented; taken up by the quarter section, as you may say; owners all on the sell and waiting for some one to come along and buy them out; prices vary from \$100,000 to \$1,000,000. Have looked at about 200 locations, and five out of the lot would I take as a gift and do work upon them. Have been at Bixby's Camp, ten miles from McMillen's, four times. Bixby has ten locations on one mountain, so located as to hold about the entire mountain. The showing for one or two of these mines is good. He has done considerable work, and is still working a small force, the class of ore being horn silver and chlorides; small strata, but very rich—varying from \$100 to \$500 per ton. He has out on the dump about 50 tons, which he claims will average \$500 per ton, but I think 40 p-r cent. of that amount would be nearer the fact. I do think he has considerable showing to make money, provided any mills were in the country to work his ore on the square. Lulus is in the employ of Bixby, and from his assays of the ores and different cuts and drifts on the ledges believe can average the ore up to \$500, and keep five stamps to work on full time. Bixby is now in San Francisco trying to make arrangements for a mill. Have been at Richmond Basin, so much talked of. Do not like the appearance; all on the surface and, in my judgment, all worked out. Did not see the McMorris claim, for he will not allow any one to go down, but am told it looks well in the bottom, vein of pay ore about twelve inches wide, average \$750 per ton. He was offered \$100,000 by San Francisco parties some time since, but asked \$1,000,000. My opinion is he will hold some time before he sells. Pete Miller and his wife are living at this place at present; he is not doing much but expects soon to take out ore from some of his prospects. Joe Lemon purchased last March a half interest in the R. C. McCormack mine, situated about one and a half miles from Globe City, and now has six men at work running surface cuts and taking out ore. The prospect is splendid, assays run all the way from a trace to \$12,000 per ton, and not under the grass roots more than 15 feet. The ledge is unlike anything I have seen in the district. It is traceable for the entire distance of the claim and varies from 60 to 100 feet wide, with large cropping on north and south side, with rich strata intermediate from six to fifteen inches wide. He can take out large quantities of good ore; should judge he had taken out during the last three months at least 40 tons. He gave \$2,500 for the half interest and has the best show to make a stake of any one in the camp. Gashweiler of San Francisco and a Mr. Breeman of Silver City, New Mexico, had a look at the property and expressed that it was the best mining prospect that they had seen in the country. Judge Riley is located about ninety mile north of this place, at the head of the Tonto Basin, and claims he has a big showing in the way of mines; he claims the ore will average \$300 per ton, and quantities in sight. This is about all of interest from this section. I may go to Tiptop and Prescott, if so, will write.

**KILLED.**—On Wednesday last John M. Whitehill, assayer at the Condor Mill, received a telegraphic dispatch stating that one of his brothers had been killed at or near his ranch, about 30 miles south of Tucson, Arizona. No particulars were received. Mr. Whitehill was one of four brothers; one being our State Mineralogist, another John M. Whitehill, and one residing in San Francisco.

**DELINQUENT.**—We publish to-day the delinquent list of the Day S. M. Company; day of sale June 10th.

The attention of the Stockholders of the Day Company is called to the card of H. H. Garrison.

**LATE RECEIPTS AT POUJADE'S:**  
Ground coffee, papers.  
Green coffee, Costa Rica.  
Tea, "M. M."  
Tea, "Turtle."  
Tea, "Gunpowder."  
Tea, "Eureka."  
Tea, "Tiger Head."

**OUR MINES.**  
**ALPS.**  
The drift on the 1200 level of the Ma-zappa has been run west 25 feet during the week. Winze below the 1200 is in on water, with more or less ore throughout. Mine producing considerable quantities of ore from the 7th, 8th, 9th and 12th levels. In the old Alps, there is a very promising body of ore. During the past week the mill has been running on custom ore which was worked very satisfactorily.

**HILLSIDE.**  
Work is being vigorously prosecuted on this mine, the extracting of ore being the main feature at present. J. B. McGee, one of the owners, thinks they have the best mine in the county and intends making a big showing as soon as the furnace starts, which will be about the 20th of June. In the meantime coal is being hauled, roads made and all the preliminary work necessary to starting.

**RAYMOND AND ELY.**  
Everything progressing well. Are getting along nicely with the work in the mine, and are also placing the compressor machinery. From 15 to 20 tons of ore still daily being extracted and shipped to the mill, which is being run on ore and tailings.

**DAY.**  
The same work is being continued in this mine, with about the same results. The winze is being pushed down and the bottom still continues in low grade ore. Are shipping ore to the mill daily.

**MATYLOWER.**  
Are sinking the main incline shaft, with good prospects.

**OUR APPORTIONMENT.**—Considerable comment has been excited in political circles of Lincoln county in regard to the apportionment made to this county by the Republican State Central Committee in comparison with that made for Eureka and White Pine counties; they only giving Lincoln county five delegates, whereas White Pine is given seven and Eureka fifteen—Eureka being allowed for an increase in her voting population but Lincoln county not. It is hoped that the Democratic State Central Committee will take this thing into consideration and give us our just dues, according to the standard which they have given out as the basis of the apportionment that is to be made; that is, by the vote of 1876, or that they will allow us for the increase of voters in the several places in the county. The total vote of this county in 1876 was 753, that of Eureka being 509; but as new camps, such as Royal City, Bristol, Lake Valley (or Patterson), Ten-Pahute, and other camps, have sprung into existence since then, we claim a voting population as follows: Pioche 450, Panaca 70, Ballonville 100, Clover Valley 15, Spring Valley 17, Eagle Valley 13, Rose Valley 7, Hiko 47, St. Thomas 17, Lake Valley 15, Royal City 50, Bristol 70, Ten-Pahute 20, Logan 40, Groom 15, El Dorado Canyon 10; Las Vegas 6, Dry Lake 25; total 977. This, according to the apportionment of one delegate for each 100 voters and one for the county at large, entitles Lincoln county to a representation of eleven delegates in the convention. We commend these facts to the Democratic State Central Committee, hoping that they will do this county justice in the matter.

**THE BABES IN THE WOODS.**—A couple of the "boys," who had been to Eagle Valley to witness the recent school examination held at that place, and who had indulged a little too freely in the brethrens cider, made the attempt to return from there during the same evening, but lost their way, and were obliged to camp out. They say during their wandering in the night they passed through a forest of large trees, from 75 to 100 feet in height, but as there are not any trees of such size within sixty miles of Eagle Valley, we presume it must have been the action of the magnifying qualities of the cider on the sagebrush.

**SCHOOL EXAMINATION.**—Last Friday week an examination of the pupils of the Eagle Valley school, under the charge of Eugene Wyman, took place. The pupils passed a very creditable examination, r-flecting credit on the teacher. A number of persons went from Pioche to witness the examination and to participate in a dance that was gotten up after the school exercises.

**TAX ON MINES.**—The Assessor gives notice in to-days issue that the taxes on the proceeds of mines for the quarter ending March 31st, 1878, are now due and payable and that it is now time to step up to the Captain's office and settle. Judge Mortimer Fuller is Deputy Assessor and acting as Assessor during the absence of R. P. Dayton.

**PAY-DAY.**—Last Monday was the pay-day of the Raymond & Ely mine, and the number of drunken men that had gathered around by night-fall at the different resorts in town reminded one in a slight degree of the pay-days of yore in Pioche. Numerous headaches on Tuesday morning were the result of Monday's pay-day.

**FOR WASHINGTON.**—Captain Woodruff having reported well, received orders to proceed to Washington City and await orders. He left last Sunday. Captain Woodruff received his promotion over 100 other applications, his record for bravery in the field of action entitling him to the position.

**BUSINESS MANAGER.**—We have before us a copy of "The Stage," a programme circular published at Virginia City by Plant & Griffin. Matt Halpin, formerly of Pioche, is the business manager of the Stage.

**EAGLE VALLEY NEWS.**  
EAGLE VALLEY, May 21, 1878.  
**EDITOR RECORD:** The farmers of this vicinity are somewhat despondent just now on account of the weather. On the night of the 16th we had a heavy snow-storm, and as our fruit trees were in full leaf and covered with fruit some of them were broken down, and the hard frost which followed the storm finished up the balance of the fruit that remained until now—the night of the 21st. It is still snowing and freezing.

On the 17th we had a school exhibition and were visited by some of our Pioche friends, Ab. Polley and Wm. Bell among the number, some of whom came loaded to the guards with plenty of that which cheers, and has been known to inebriate, and notwithstanding the weather we had a good time. Our scholars gave proof of the efficiency of their teacher, Eugene Wyman, by answering many hard questions in the various branches of study. At the close of the exercises the children were presented with prizes, to the value of about \$20, by their teacher.

In the evening we had a dance, which would have been a success no doubt but for the unavoidable absence of our musician, which obliged us to fall back upon the exertions of a fiddler who knew as much about music as a hog does about war.

During the course of some of the remarks which were made at the close of the school, we received—somewhat inappropriate perhaps—some instructions in regard to the Mormon religious belief, which so affected Billy that he wished to be baptized immediately, but as he is believed by some to be the author of that for story, his request was denied until he shall have cleared himself of that suspicion. Whenever this is done you shall be informed immediately.

**SECRETARY OF THE CLUB.**  
**LOST.**—We hear frequently of people becoming lost in large cities, such as New York and Philadelphia, but last Sunday was the first time that we have ever known any one to lose themselves in a mountain town of the dimensions of Pioche, and yet such was the case of a party just arriving from the East. He had procured lodgings on Meadow Valley street, and had, in some inexplicable manner, without assistance, strayed on to Main street, where he became utterly bewildered, losing all track of his lodging-house, and it was only after two hours visiting the other lodging-houses on Main street that he was finally directed to his own on Meadow Valley street.

**DISTRICT COURT.**—The District Court met on May 18th, and transacted the following business: Barter vs. McKee; the argument on a motion for a new trial was heard; a new trial was granted, to take place June 10th, the case to be submitted to a jury trial. Dan Cohn vs. Jacobs & Sultan; attachment suit; defendant argued and overruled; the defendant given ten days in which to answer. A venire was issued for 30 trial jurors, returnable June 10th. Court adjourned to same date.

**PERSONAL.**—R. P. Dayton, Assessor, returned on Thursday from a trip to the lower portion of the county. He says that there is no truth in the report that Bennett had killed any Indians at Pah-Rump. A. J. Blair and family came in on Thursday's Hamilton stage. They will probably locate at Bristol. John Diamond came in from Silver Reef on Thursday on business connected with the Sheriff's office at that place. He left on Friday's stage.

**SCHOOL ELECTION.**—The School Trustees give notice that a vote will be taken on the 15th day of June, to determine whether a tax of \$1,000 shall be levied to support the public schools of this precinct, for a longer period than the funds at present on hand, or to be received will permit.

**CHRISTY BULLION.**—The Christy Mill & Mining Company shipped from Silver Reef, from May 18th to May 22d, two bars of bullion, valued at \$6,706.86.

**SOLD AND PURCHASED.**—Charles Goe-dicke gives notice that he has sold out his brewery business to Henry Eilers, Lacour street.

**PICOCHE BULLION.**—\$12,586 in bullion was shipped during the past week, according to reports of Superintendents.

Nine out of every ten men who carry pistols are afraid to use them, and would jump and turn pale and look as if they had swallowed a chew of tobacco if they heard a parlor match go off in the dark. We have examined the list of those who have applied for licenses to wear artillery, and we know for a dead certainty that rather than shoot off a pistol they'd stop drinking.—[New York Dispatch.

**WARD REFLEX:** A well-founded rumor is going the rounds to the effect that when Hugh White takes the mail contract between Eureka and Pioche in July, he will run buckboards exclusively, abandon the route to Hamilton by way of Robinson and take the nearer route between Ward and Hamilton through White River Valley and Water Canyon.

**Tybo Sun:** Who says Indians cannot be civilized? We have a squaw here in Tybo that dances every night in the hurdy house. She prances up and down to the tune of Money-musk with a kind of a "rack back davy step" that tickles the boys mightily. So the world moves, and we glide with the stream.

The dueling pistols used by Aaron Burr in his duel with Alexander Hamilton, are said to be in the possession of a citizen of Louisville. They were left to him by his uncle, an army officer, who himself purchased them from Burr for \$500. It is asserted that they have been used in eleven duels.

**LATEST NEWS BY MAIL.**  
**WASHINGTON, May 21.**  
The Democratic National Committee, to-day, will consider chiefly the proper course of the investigation under the Potter resolution. The extreme Democrats propose that when conclusive evidence is found the electoral votes of Florida or Louisiana should have been counted for Tilden, a resolution should be presented in the House declaring the seating of the President and Vice President illegal, and that a vacancy exists in their offices. If this passes both Houses, Congress will no longer recognize them, but will recognize the President of the Senate, who it is expected will be Thurman. This scheme is unlikely to be pursued. Potter has gone to New York to consult Tilden, and the committee will not be organized until he returns.

**NEW YORK, May 21.**  
The Socialistic Labor party of New York and vicinity made an appeal to the people of the United States, stating their aims and objects and the means by which they seek to attain their ends. The appeal contains a demand for the amelioration of the condition of the workmen. They declare that they are not a secret society, but a political party, and seek to attain their ends peacefully and legally. They affirm that they have a right, by the Constitution, to carry arms and drill, asserting that it is only for defense, as the privileged classes will attempt to uphold their privileges by force.

**RICHMOND, Va., May 21.**  
News was received last night that six hundred Irishmen are drilling at Chassey, New York, sixty-nine miles from here. The Canada people believe there is a movement for the invasion of the Dominion. It is generally believed that the Fenians are making their way into Canada. The military authorities there are on the alert.

**CONSTANTINOPLE, May 21.**  
An official dispatch to the Turkish representatives abroad, thus described an emette which took place in Constantinople yesterday. About thirty representatives entered the garden of the palace inhabited by ex-Sultan Murad, and raised shouts of "Long live the Sultan!" The sentinels opposed the entry of these men into the palace and were fired upon, one being killed. Troops arriving the assailants were driven back; some were killed and wounded on both sides. All Suavi, who appeared to have acted as the organizer and leader of the attack, was killed. The affair had no other consequences; public tranquillity is undisturbed.

**LONDON, May 21.**  
In the House of Commons, this afternoon, Sir John Holker, Attorney General, in reply to an inquiry, said he heard of ships purchased by persons said to act on behalf of Russia, but there is no reason to suppose the ships will be employed in the event of war as privateers, in contravention of the Paris declaration. There is no reason to believe the United States will depart from the observance of the three rules of the Washington treaty. There is no necessity for discussing the responsibility resting on the Governments of Russia and United States, since there is no reason to suppose they would violate their respective engagements.

The reaction from the optimistic views of last week is stimulated by facts which are gradually becoming known concerning the Russian movements before Constantinople. Though these movements have been for sanitary reasons, they came near precipitating a collision. The Russian line at one time was pushed so near the Turkish works that the latter were manned and ammunition served out, and General Valentine Baker sent an aide de camp to notify the Russian commander that he would fire on him if he did not withdraw. The effect has been to direct the attention of the Turks to the comparatively weak state of that portion of their line which covers the Black Sea entrance to the Bosphorus, which the Russians naturally desire to secure in case of hostilities. The Turks are therefore taking precautions in that direction.

**RENO, Nev., May 18.**  
The Jury, in the case of the State vs. Harrington, returned a verdict of murder in the second degree. He will be sentenced on Saturday, May 25.

**Virginia Enterprise, of the 18th:** At 6:45 o'clock last evening Andrew Williams and Richard Rodds, two miners working at the bottom of the C. and C. shaft, were instantly killed by the fall of a mass of rock weighing about a ton. In all six men were at work at the bottom of the shaft, 1950 feet below the surface, at which point a station is about to be cut out. Rodds and Williams were on the west side of the shaft where they were engaged in drilling a hole for blasting. As a station was to be cut out at that point the shaft had only been timbered down to within ten feet of the bottom. Suddenly and without giving the slightest warning a mass of rock of about a ton weight fell from just under the wall plate or lowest timber of the shaft. It came out of the side of the shaft in a solid block and fell squarely upon the two men named, breaking into two or three pieces as it pinned them to the ground. A single groan was all that was heard from the men after the rock struck them. By which man the groan was uttered those left alive could not tell.

It will, perhaps, be comfortable to the poor to be informed that a philanthropic scientist is organizing a movement for supplying every son and daughter of poverty with a microscope, by means of which the animalcule in water will be sufficiently enlarged to satisfy them that nature has put it within their means to fare sumptuously every day.—[Yonkers Gazette.

**Reno Journal, 18th** Yesterday afternoon at about 4 o'clock the counsel concluded their argument, the Judge charged the jury and they retired to deliberate. The result of the verdict was: Murder in the second degree. Harrington will be sentenced on Saturday, May 25th.

A Boston paper says: "A butterfly was caught at the South End yesterday. It may be safe enough to catch a butterfly at the south end, but when you go to catch a wasp, you want to catch it at the northeasterly end, shifting westerly toward the head."
